

Vanillyl Butyl Ether

VBE is an oil-soluble warming agent. It can induce an enduring and gentle warming sensation on our skin and increase its temperature which speeds up the burning of the subcutaneous fat and makes the body slim. As it is very stable and nontoxic, VBE has become a good additive to the modern Functional body-slimming products.

CAS No.: 82654-98-6

MW: 210.27

MF: C₁₂H₁₈O₃

Function:

Induces an enduring and gentle warming sensation,

Increases the skin temperature, speeds up the burning of subcutaneous fat, makes the body slim.

Application:

Warming agent, suitable for body slimming products, feet care products and other partial warming products. Suitable to emulsion, cream etc. It is suggested that it should not be used for any face or eye products or be used to any part of the body that could be easily stimulated.

Spec sheet:

Items	Specification
Appearance	Colorless to yellow only liquid
Odor	Light characteristic
Solubility	Insoluble in water, soluble in oil
Purity	≥97.0%
Refraction coefficient	1.511-1.535
Density	1.048-1.068g/cm ³
Heavy metals	< 10ppm
Arsenic	< 2ppm

Usage: 0.1~1.0%, usually 0.2~0.3%.

Adding method: Add at about 50°C and stir until it distributes evenly. In a few cases, add at 70°C when emulsifying and homogenizing.

Package: 10.0kg /plastic drum.

Storage: The color may change when exposed to light, heat, contacting with Oxygen, so it should be stored in sealed receptacles, put in refrigerator (temperature remains around 4°C), kept away from the light. One-year validity.
